Alexandria, VA 22313-1450

SUPPLEMENTAL CONSENT OF ASSIGNEE  
AND POWER OF ATTORNEY

Sir:

This submission includes the following:

1. Reissue Application: Consent of Assignee;
2. Revocation of Power of Attorney with New Power of Attorney and  
Change of Correspondence Address;
3. Statement Under 37 C.F.R. 3.73(b); and
4. An Assignment of the above-identified application from Cuetronics,  
Inc., to Relume Corporation.

These documents are being submitted to supplement corresponding documents currently of record in the above-identified application.

Recently, the applicant discovered that the original Statement Under 37 CFR 3.73(b), dated October 12, 2006, inadvertently identified the wrong assignee when the Statement was signed. At the time, it was believed that Relume Corporation owned the entire right, title and interest to the present application, as it did to U.S. Patent 5,661,645, which the present application seeks to reissue.

In fact, the present reissue application (but not original U.S. Patent 5,661,645) had been assigned by Relume Corporation to Cuetronics, Inc., on September 27, 2004. Cuetronics, Inc. has now re-assigned the entire right, title and interest back to Relume Corporation by an Assignment dated March 24, 2008 (enclosed document no. 4).

In view of the inadvertent error in the original Statement Under 37 CFR 3.73(b), the enclosed new Statement (document no. 3) is submitted to correctly reflect the current ownership by Relume Corporation of both the present application no. 09/382,702 and U.S. Patent 5,661,645.

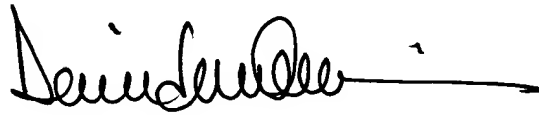

The new Consent of Assignee (enclosed document no. 1) and Power of Attorney (enclosed document no. 2) are being submitted to clarify the record, in that previous versions of these documents were filed in the name of Relume Corporation under the authority of the previous erroneous Statement Under 37 CFR 3.73(b). The new Consent of Assignee and the new Power of Attorney are identical to the originals. However, the applicant is re-submitting them to ensure that the record is clear that the actual owner of the present application and U.S. Patent

5,661,645 in fact consents to reissue of the patent and wishes prosecution to continue in accordance with the original Power of Attorney.

Any fees due on account of this paper may be charged to Deposit Account No. 14-1131.

All correspondence and telephone inquiries should be directed to the applicant's undersigned attorney.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "David M. Quinlan", followed by a long horizontal flourish line.

SUBMISSION OF AMENDED DRAWING

Submitted herewith is a sheet of drawings with an amended version of Fig. 6a, and a marked-up copy of the original drawing sheet (with the legend "Annotated Marked-up Drawings" required by 37 C.F.R. § 1.173(b)(3)(i)) showing the change that has been made.

The change shown on the enclosed marked-up version is made because there should be illustrated in that figure a functional connection between the "voltage sensing means" 48 and the "controlled load means" 50, as represented in Fig. 6b by the circuit line including the resistor 58. See col. 7, lines 57-59. Accordingly, there should be a line between these two "means" in Fig. 6a to make the drawings consistent with the description in the specification. Hochstein Declaration, para. 10. Amended Fig. 6a includes that line. It also includes the word "Amended," in accordance with 37 C.F.R. § 1.173(b)(3).

Any fees due in connection with this paper may be charged to Deposit Account No. 14-1131.

All correspondence and telephone inquiries should be directed to the applicant's undersigned attorney.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "David M. Quinlan", with a horizontal line drawn underneath it.
